

MAINTENANCE FOR FRP

You have selected General Partitions FRP finish on your toilet compartments. The beauty of your FRP finish is only part of the pleasure it will give you. With proper care, the surface will keep its fresh good looks for many years.

Everyday cleaning needs no more than a quick wipe with damp sponge. Our tough surface resists dirty fingerprints, grease, grime, and scuffs. Below you will find the basic steps, as they should be followed for cleaning your partitions.

1. Wash the surface with a damp cloth and mild dishwashing liquid or powdered detergent and warm water. Use a soft cloth. Rinse with warm water, and dry with a soft cloth. For a lustrous finish, wipe down with WD-40™
2. For spots that you can't remove with step one, use an all purpose cleaner or bathroom cleaner (such as Fantastic®, 409®, Glass Plus®, or Comet® bathroom cleaner). Follow the manufacturer's instructions. Rinse with warm water, and dry with a soft cloth.
3. For very stubborn stains, make a paste with baking soda and water. The paste will be slightly abrasive, so work carefully to keep from damaging the surface. Dip a soft bristle brush into the paste and gently rub the spot pressing very lightly in a circular motion. Rinse the surface with warm water and dry with a soft cloth. Repeat steps 1, 2, and 3 as necessary if the spot seems to be going away.
4. If the spot still remains, we recommend KART KLEEN Fiberglass Cleaner. Please contact your local General Partitions dealer to order.
